EDUCATION

- **PCET's Nutan Maharashtra Institute of Engineering and Technology** *Pune, India*
  Bachelor of Engineering (B.E.) in Computer Engineering; CGPA: 8.17 *Nov 2022 – June 2026*
  Courses: Operating System, DSA, Object-Oriented Programming, Artificial Intelligence, Machine Learning, Networking.

TECHNICAL SKILLS

- **Languages:** C++, Java, Python, JavaScript (ES6+), SQL.
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS.
- **Backend:** Node.js, Express.js, Flask, REST APIs, JWT Auth.
- **Databases:** MongoDB, MySQL, SQLite, Relational Database Design.
- **Cloud & DevOps:** AWS (EC2, S3, RDS), (GCP), Docker, Git, GitHub.

EXPERIENCE

- **Thynk Technology India** *Onsite*
  Software Engineering (Frontend) Intern *Nov 2025 – Mar 2026*
  - Engineered **8+ production-ready React components** with optimized state management and seamless **REST API integration**, eliminating **∼30% of manual workflows** and reducing redundant code by **∼40%**.
  - Diagnosed and resolved **critical component lifecycle bottlenecks**, improving **UI rendering performance by ∼20%** and delivering a measurably faster, scalable frontend across all key application modules.
- **Edunet Foundation** *Remote*
  Machine learning Intern *June 2025 – July 2025*
  - Built and deployed an **e-waste image classification model** using **Python and Deep Learning** — covering end-to-end preprocessing, training, and evaluation — achieving **90%+ model accuracy** and improving decision-making efficiency by **30%**.

PROJECTS

- **AI-Powered Contract Analysis Platform** GitHub | Live Demo
  React, Node.js, Express.js, MongoDB, REST APIs, GROQ AI
  - Architected and delivered a **production-grade full-stack MERN platform** automating contract ingestion, analysis, and reporting — reducing manual legal effort by **∼70%** using **LLM-driven pipelines** and **enterprise-grade JWT authentication** with role-based access control across multi-tier users.
  - Integrated **LLM APIs** for real-time contract summarization, intelligent clause extraction, and automated risk flagging — reducing time-to-insight to **under 3 seconds** per document and **eliminating manual review bottlenecks entirely**.
  - Engineered **20+ RESTful APIs** with layered middleware and led end-to-end **Postman** testing with parameterized collections — achieving **100% endpoint coverage** and **zero critical production defects** at deployment.
- **Crowd-Sourced Road Hazard Intelligence System** GitHub | Live Demo
  Python, React, Flask, Machine Learning, Flask RESTplus
  - Architected a **full-stack crowd-sourced road hazard platform** with real-time multi-user reporting, delivering a community-driven safety solution that **scaled to city-level hazard tracking** with zero manual moderation.
  - Engineered an **ML-powered image classification pipeline** to autonomously detect potholes in user-uploaded images with **90%+ accuracy** — fully eliminating manual verification and accelerating hazard validation by **∼80%**.
  - Built **15+ RESTful APIs** and a scalable **MongoDB schema** for end-to-end hazard data management — enabling real-time querying, structured image metadata storage, and **seamless full-stack data flow**.

ACHIEVMENTS

- Secured **Rank 1 out of 50+ teams** in the Internal Hackathon and Mini Project Competition as **Team Lead** — delivered a fully working solution under time pressure, demonstrating leadership and execution excellence.
- Achieved **Institutional Rank 17** in competitive coding, placing in the **top tier** of the institute across all branches
- Earned **HackerRank Gold Badge** in both **C++ and SQL**, demonstrating advanced problem-solving proficiency across systems programming and database querying.
- Solved **300+ coding problems** across LeetCode, HackerRank — consistently strengthening data structures, algorithms, and problem-solving depth.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner**
- **Data Science and Big Data Analytics**
- **Generative AI Certification**
- **Full Stack Development(SimpleLearn)**
